

Stillwater Timberlands Advisory Group
August 23rd, 2000

Community Advisory Group
Walk in the Woods
August 23rd, 2000
7:00pm

Summary:

This evening was made available to the Advisory Group and the public to look at examples of different logging practices uses in Weyerhaeuser's "trial forest" located behind Valley Building Supplies in Paradise Valley. Eight members of the Advisory Group and thirteen members of the public were accompanied by the Groups Facilitator Cathy Bartfai and led by Weyerhaeuser representative Rod Tysdal.

Rod started the evening by discussing local logging practices and led the group through a number of stands and clearings, explaining the principles and practices behind each. With limited day light, the group toured for aprox. 1 ¼ hours before returning to the Weyerhaeuser offices for discussion.

It is noted that group members on the tour definitely felt there was a need to do more of this kind of educating for the whole group.
